

Sprint planning 1

On Thursday 18 August, set up a meeting with the client, Mr Michael De Carvalho. Mr Michael said he wanted a mobile development application for the Witsie Community. He explained that the android application should be like a social platform where students can interact with each other and get to know each other. The main goal of this application should be to help students build lifelong connections. In the upcoming sprint, the product manager wants the following user stories to be attended to:

- Users should be able to create an account
- Users should be able to access profiles through their own credentials
- Users should be able to search for other users
- Users should be able post pictures
- Users should be able to add captions to their pictures
