

Sprint review 2

Wednesday 21 September was a hot, sunny day and we set up a sprint review meeting with the product owner Mr Michael De Dervalho. We set up this meeting so that we could show Mr Michael what we were working on and so that we could also get his opinions on how we can make his application the best he could ever dream of. In this meeting we look at each user story and how we implemented and if there is any room for improvement

Sign Up Page

Mr Michael wanted us to make some changes to the sign-up page because he believed it was too spaced out and he wanted something compact

The image shows a side-by-side comparison of two mobile app sign-up screens. The left screen, titled 'Wits Social', has a dark blue header and a light gray background. It features the heading 'Create Account' followed by three input fields labeled 'username', 'Password', and 'Confirm Password'. Below these is a wide, light gray 'SIGN UP' button, and further down is a 'LOGIN' link. The right screen has a black header and a light gray background. It features the heading 'Create an account' followed by four stacked input fields labeled 'Full Name (Required)', 'Email (Required)', 'Password (Required)', and 'Confirm Password (Required)'. Below these is a rounded black 'SIGN UP' button. At the bottom, it says 'Already have an account?' followed by a blue 'Sign In' link. Both screens show status bars at the top with time, signal, and battery indicators.

A comparison between the previous sign-up page (left) and the current page (right). One can clearly see that the current implementation is nicer and more appealing than the first. Mr Michael was really impressed by this transition.

The Login in page

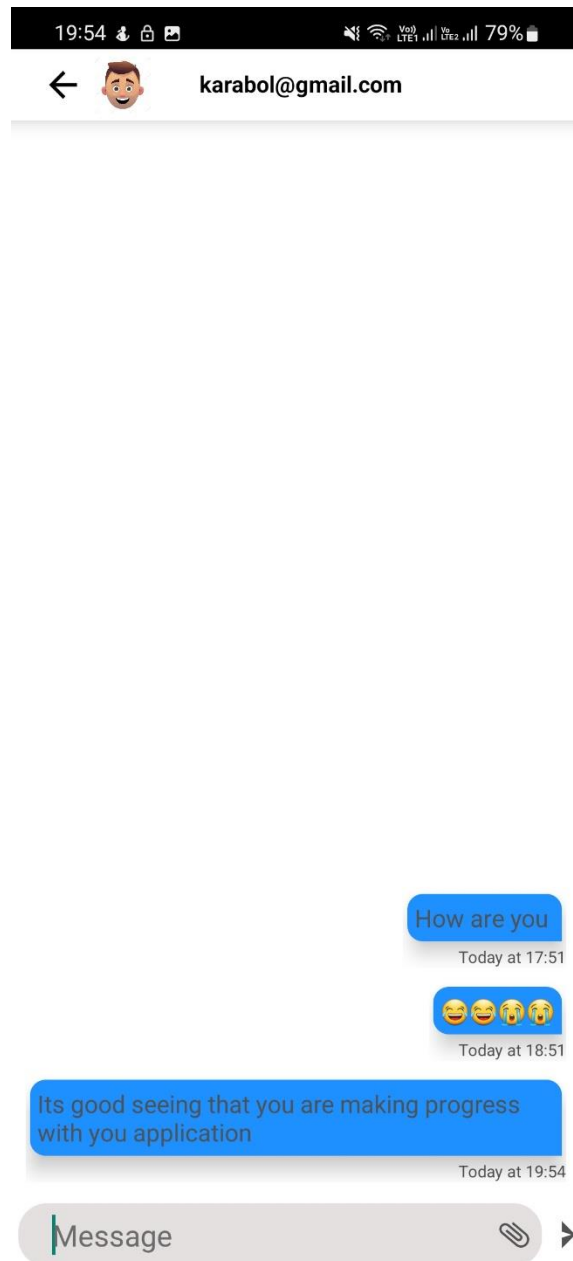

Just like the sign-up page, Mr Michael wanted us to modify it so that it looks like the sign-up page for uniformity.

The image shows two side-by-side mobile app screens for 'Wits Social'. The left screen, labeled 'The old one (left)', has a dark blue header with the time 13:46 and 58% battery. It features a 'Login' title, input fields for 'Name' and 'Password', a grey 'LOG IN' button, and a 'Sign Up' link. The right screen, labeled 'The new look(right)', has a black header with the time 19:44 and 80% battery. It features a 'Sign In' title, a rounded rectangle containing 'Email (Required)' and 'Password (Required)' input fields, a black 'SIGN IN' button, and a 'Don't have an account yet? Sign Up' link. A caption at the bottom states: 'The new look(right) is neater than the old one (left)'.

The new look(right) is neater than the old one (left)

Sending Messages.

One of this sprint user stories was that the user must be able to send another user a text message. We implemented a very basic version of this user story but there still home for a lot of improvement. Both the developers and the product owner felt more could be done but loadshedding / time was this issue.

Following different users

Mr Michael wanted us to implement follow-feature where a user can follow different users on the application. This can be done by opening the person's profile and then clicking follow.
