

Sprint Planning 2

On Wednesday 21 September 2022z we set up an online with the product owner Mr Michael De Carvalho for **Sprint Planning 2** meeting. Mr Michael was impressed by what we did in the previous sprint and the product we had. The next focus of the sprint is the usability of the application and adding new functional features to benefit the user. To achieve this, the Mr Michael gave us the following user stories:

- Users should be able to add captions to their posts
- Users should be able to view profile information of other users
- Users should be able to follow other users
- Users should be able to message other users

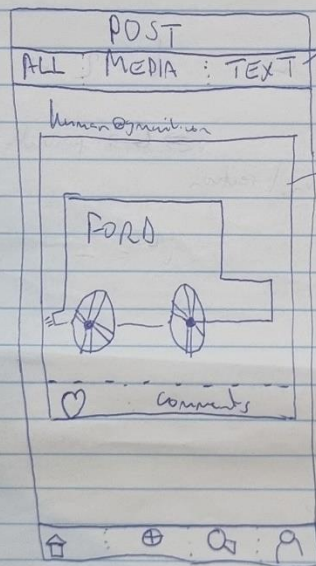

The invitation link to the customer and rest of the developers

Sprint Planning 2

What are the goals of this sprint

- 1 Change login interface
- 2 change sign-up interface
- 3 Users should add to add caption
- 4 View different user's profile
- 5 Able to follow other user
- 6 change layout of home screen

Proposed layout

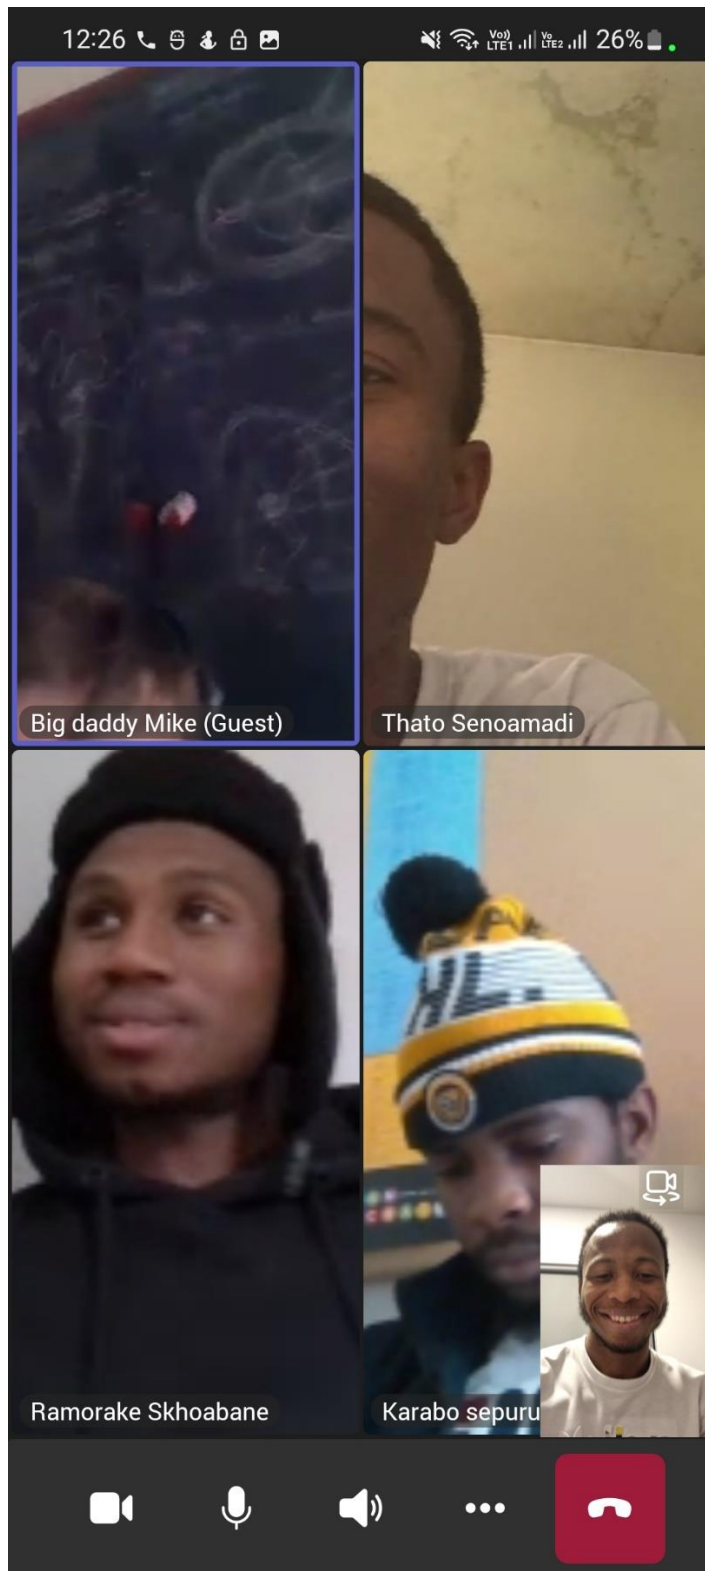

like twitter
more people can see text
posts

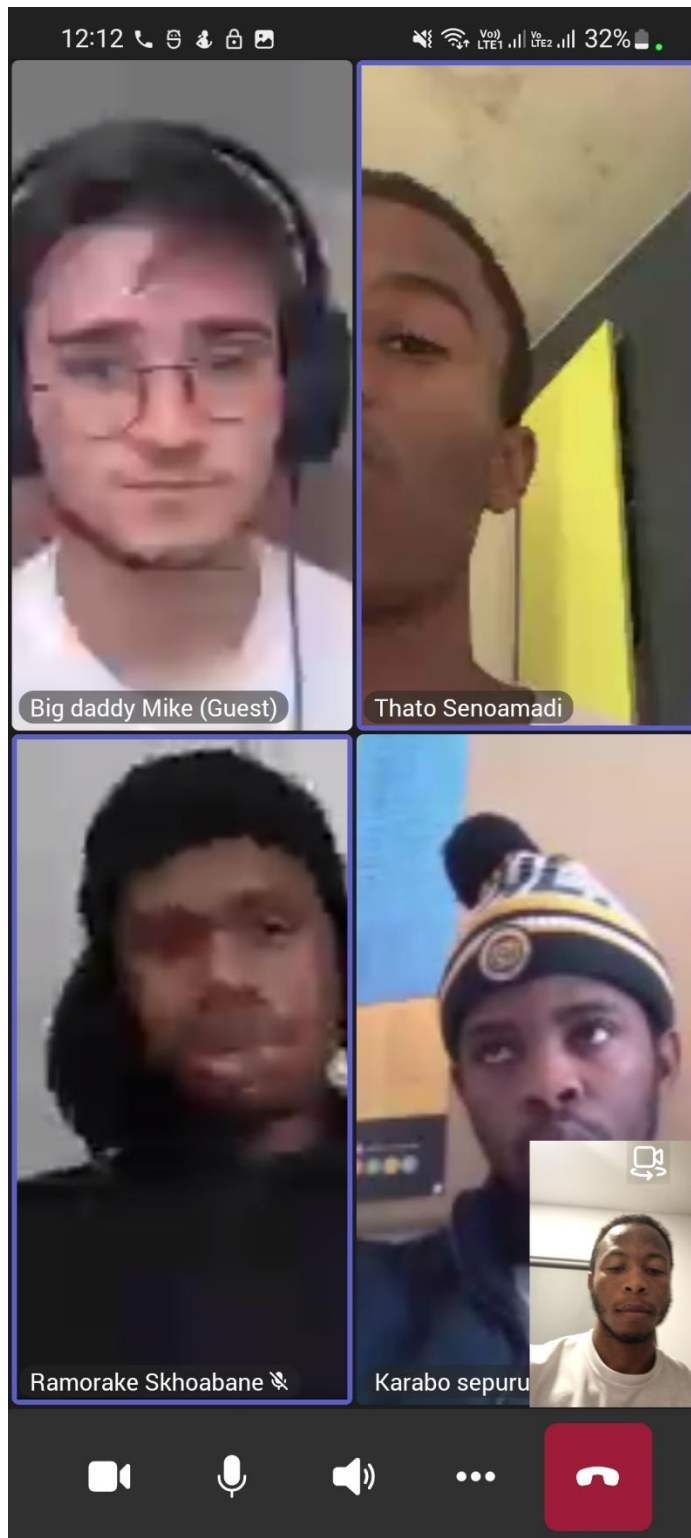

just a picture or
a video

Remember to stick to the color scheme of the app

One of the developing members jotting down what the product owner was saying so that we do not miss out on any important information. These scripts will be kept in a file for future use.

The client (Big Daddy Mike), drawing on a chalk board what he wants the application to look like by the end of the sprint

The product owner outlining what he wants us to accomplish by the end of this sprint
