

Backlog Refinement

The main goals for this sprint:

- Post texts
- Like pictures
- Commenting on posts
- Adding profile pictures
- List all followers

The development team had a few questions for the client:

- What is our main priority
- In what format should the user post texts
- Colour of like button
- Structure of commenting
- List of following and follower
- Dimensions of profile picture

User stories:

- As a user, I should be able to post text so that other users can see it
- As a user, I should be able to like pictures so the other user can see it
- As a user, I should be able to comment a picture so that I can share my thoughts
- As a user, I should be able to upload a profile picture so that it can be unique
- As a user, I should be able to sign out of my account so that other users can sign in
