BACKLOG REFINEMENT 2

The main goals of sprint 2:

- Login interface
- Signup interface
- Captioning a post
- Following users
- View other users
- Messaging

The developers had to ask the product owner some questions for clarity:

- What should the login look like?
- What should the sign-up look like
- Which follow-follower feature?
- Types of messages to be sent
- What the person's bio should look like
- Type of uploads on the main menu

User stories

- As a user you should be able to follow other users so that I can see their posts.
- As a user you should be able to search your history of actions.
- As a user, I should be able to view another user's profile so that I can see their information
- As a user you should be able to log in into your own profile.

- As a user, I should be able to view another user's profile so that I can see their information
